

CSS Float

Topics : [CSS](#)

Written on [April 08, 2021](#)

The CSS float property is used for positioning contents to left, right or none. Also image can be floated left or right.

CSS Float Property Values

1. **left** : It is used to float the element to the left.
2. **right** : It is used to float the element to the right.
3. **inherit** : It is used to inherit this property from its parent element.
4. **none**: It specifies that the html element is not floated.

Syntax :

```
<style>
div_left
{
  float:left;
}
div_right
{
  float:right;
}

div_none
{
  float:none;
}

div_inherit
{
  float:inherit;
}

</style>
```

Lets see example for float to understand how it works as below

Example :

```
<html>
<head>
<title>Learn Css float property tutorials by aryatechno</title>
<style>
.box {
width: 35%;
height: 100px;
padding: 10px;
background-color: #0000FF;
border:#000000 solid 1px;
color:#FFFFFF;
float:right;
}
</style>
</head>
<body>
<h2>Applied right float for below example.</h2>
