Node.js MySQL - Create Database

MySQL package is used to create database in mysql using node.js.

CREATE DATABASE database name mysql statement is used to create new database in mysql database.

Example :

```
const mysql = require('mysql');
```

```
const db = mysql.createConnection({
```

```
  host: "localhost",  
  user: "root",  
  password: "*****"  
});
```

```
// connect to database
```

```
db.connect((err) => {
```

```
  if (err) {
```

```
    throw err;
```

```
  } else {
```

```
    console.log('Connected to database!');
```

```
    db.query("CREATE DATABASE proddb", function (err, result) {
```

```
      if (err) throw err;
```

```
      console.log("New Database created!");
```

```
    });
```

```
  }
```

```
});
```

```
//Output : Connected to database! New Database created!
```
