Node.js MySQL Update

MySQL package is used to update data into table in mysql using node js.

UPDATE mysql statement is used to update data into table in mysql database.

Example :

```
const mysql = require('mysql');

const db = mysql.createConnection({

  host: "localhost",
  user: "root",
  password: "*****",
  database : "aryadb"

});

// connect to database
db.connect((err) => {

  if (err) {

    throw err;

  }else{

    console.log('Connected to database!');

    db.query("update employee set emp_addrees ='ahmedabad, india' where
emp_id=1", function (err, result) {
      if (err) throw err;
      console.log("Updated record : "+result.affectedRows);
    });
  }

});
```

Write above code in server.js file and run this program as below.

```
D:\nodejs\website> node server.js
```

It gives output as below.

```
Updated record : 1
```
