

# PHP code for constant

Topics : [PHP Programs](#)

Written on [December 13, 2022](#)

PHP code for constant - constant can be defined by const keyword and define method

**Example :**

```
<?php
define("CONSTNAME", "Learn PHP constant");
echo CONSTNAME;
?>

<?php
const VARNAME = "Learn PHP constant";
echo CONSTNAME;
?>

<?php
define("SHORTDESC", "Welcome to aryatechno tutorials!");
function checkScope() {
echo SHORTDESC;
}
checkScope();
?>
```

**Output :**

*Learn PHP constant Learn PHP constant Welcome to aryatechno tutorials!*
