

CSS Text Background Color

Topics : [CSS](#)

Written on [March 18, 2021](#)

CSS Text Background Color property is used to set background color of text. We can set different background color like yellow, green, red, black, purple, white, blue, orange etc. using background-color property.

Syntax:

By Hex Code,

```
background-color: #660000;
```

By RGB,

```
background-color:rgb(255,0,0);
```

By color name,

```
background-color:red;
```

Example :

```
<html>
<head>
  <title>Learn Css text background color tutorials</title>
</head>
<body>
  <p style="background-color:#FF0000">Learn Css text background color tutorials by
aryatechno</p>
</body>
</html>
```

Output :

Learn Css text background color tutorials by aryatechno
